   - Thejan Rupasinghe

3. **Topic**

   Analyzing demand for medical equipment, medicines, and chemicals of XYZ Medical Supplier company

4. **Challenge**

   It is important for XYZ company to know the number of sales beforehand.
   - The company buys medical items from various other suppliers. So the company can preorder from its vendors.
   - XYZ company needs to have storage for the medical items.

5. **Data Set**

   This data set shows the medical instruments and medicines issued to XYZs customers (mostly government hospitals) in the 2017-2018 financial year. The dataset contains 18000 rows with fields such as name, quantity, unit price, customer, supplier, region, etc.

6. **Outcome**

   - Visualizing existing sales data.
   - Identifying/Predicting the demand for each medical equipment, medicines, and chemicals
